A Thousand Martian Sunsets

By www.unmannedspaceflight.com

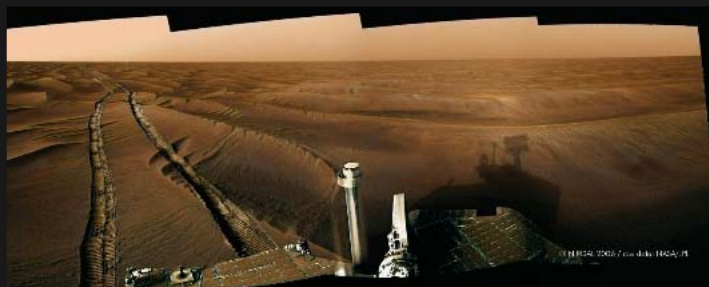

A Thousand Martian Sunsets is the story of the Mars Exploration Rovers, as told by the fanatics at <http://www.unmannedspaceflight.com>, a group of expert amateur Internet space geeks. Most of the images contained in this book were processed in some way by UMSF members. In some cases, NASA images were used for key events.

Above is a whimsical photo created by Ant103, depicting various members celebrating with Spirit and Steve Squires at the Columbia Hills.

Dedicated to the MER team, and everyone else who expands our horizons (you too Mike C!)
